Article 1

This Protocol shall apply to the products listed in Chapters 72 of the Common Customs Tariff. It shall also apply to other finished steel products that may originate in future in the Republic of Macedonia under the above chapter.

Article 2

Customs duties on imports applicable in the Community on steel products originating in the Republic of Macedonia shall be abolished at the entry into force of the Agreement.

Article 3

Customs duties applicable in the Republic of Macedonia on imports of steel products originating in the Community shall be progressively abolished in accordance with the following timetable:

1. each duty shall be reduced to 80 % of the basic duty at the beginning of the first year after the entry into force of the Agreement;
2. further reductions to 60 %, 40 %, 20 % and 0 % of the basic duty shall be made at the beginning of the second, third, fourth and fifth year respectively after the entry into force of the Agreement.

Article 4

1. Quantitative restrictions on imports into the Community of steel products originating in the Republic of Macedonia as well as measures having equivalent effect shall be abolished on the date of entry into force of the Agreement.
2. Quantitative restrictions on imports into the Republic of Macedonia of steel products originating in the Community, as well as measures having equivalent effect, shall be abolished on the date of entry into force of the Agreement.

Article 5

1. In view of the disciplines stipulated by Article 69 of this Agreement, the Parties recognise the need and urgency that each Party addresses promptly any structural weaknesses of its steel sector to ensure the global competitiveness of its industry. The Republic of Macedonia shall therefore establish within two years the necessary restructuring and conversion programme for its steel industry to achieve viability of this sector under normal market conditions. Upon request, the Community shall provide Republic of Macedonia with the appropriate technical advice to achieve this objective.

2. Further to the disciplines stipulated by Article 69 of this Agreement, any practices contrary to this Article shall be assessed on the basis of specific criteria arising from the application of the State aid disciplines of the Community, including its secondary legislation, and including any specific rules on State aid control applicable to the steel sector after the expiry of the ECSC Treaty.

3. For the purposes of applying the provisions of paragraph 1(iii) of Article 69 of this Agreement with regard to steel products, the Community recognises that during five years after the entry into force of this Agreement, the Republic of Macedonia may exceptionally grant State aid for restructuring purposes provided that:

- it leads to the viability of the benefiting firms under normal market conditions at the end of the restructuring period, and
- the amount and intensity of such aid are strictly limited to what is absolutely necessary in order to restore such viability and are progressively reduced, and
- the restructuring programme is linked to a global rationalisation and reduction of capacity in the Republic of Macedonia.

4. Each Party shall ensure full transparency with respect to the implementation of the necessary restructuring and conversion programme by a full and continuous exchange of information to the other Party, including details on the restructuring plan as well as amount, intensity and purpose for any State aid granted on the basis of paragraph 2 and 3 of this Article.

5. The Cooperation Council shall monitor the implementation of the requirements set out at paragraphs (1) to (4) above.

6. If one of the Parties considers that a particular practice of the other Party is incompatible with the terms of this Article, and if that practice causes or threatens to cause prejudice to the interests of the first Party or material injury to its domestic industry, this Party may take appropriate measures after consultation within the Contact Group referred to in Article 8, or after thirty working days following referral for such consultation.

Article 6

The provisions of Articles 6, 7 and 21 of the Agreement shall apply to trade between the parties in steel products.

Article 7

1. The Contracting Parties recognise the need for an administrative procedure having as its purpose the rapid provision of information on the trend in trade flows in respect of the trade in steel products originating in the Republic of Macedonia in order to increase transparency and to avoid possible diversions of trade.

2. The Contracting Parties therefore agree to establish a double-checking system, without quantitative limits, for the import into the Community of steel products originating in the

Republic of Macedonia; to exchange statistical information on export and surveillance documents and to hold consultations promptly on any problems arising from the operation of such a system.

3. The details of the double-checking system are contained in Annex I to this Protocol. The continuing need for this system shall be regularly reviewed. The Annex may subsequently be amended or the double-checking system abolished by means of a Decision of the Cooperation Council.

Article 8

The Parties agree that the special body already established by the Cooperation Council, namely 'the Contact Group on Iron and Steel products'⁴, will discuss the implementation of this Protocol.

⁴ Decision No. 1/98 of 20 March 1998;

ANNEX I

concerning the introduction of a double-checking system for the export of certain steel products from the Republic of Macedonia to the European Communities

Article 1

1. From the date of entry into force of the Interime Agreement between the European Community and the Republic of Macedonia (hereinafter referred to as respectively 'the Agreement' and 'the Community'), imports into the Community of the products listed in Appendix I originating in the Republic of Macedonia shall be subject to the presentation of a surveillance document conforming to the model shown in Appendix II issued by the authorities in the Community.
2. The classification of the products covered by this Protocol is based on the tariff and statistical nomenclature of the Community (hereinafter called the 'combined nomenclature', or in abbreviated form 'CN'). The origin of the products covered by this Protocol shall be determined in accordance with the rules in force in the Community.
3. The competent authorities of the Community undertake to inform the Republic of Macedonia of any changes in the combined nomenclature (CN) in respect of products covered by the double-checking system before the date of their entry into force in the Community.
4. Import into the Community of the iron and steel products listed in Appendix I and which originate in the Republic of Macedonia shall, in addition, be subject to the issue of an export document by the competent authorities of the Republic of Macedonia. In order to avoid problems at the end of a year, presentation by the importer of the original of the export document must be effected not later than 31 March of the year following that in which in the goods covered by the document were shipped.
5. An export document will not be required for goods already shipped before the date of entry into force of the Agreement, provided that the destination of such products is not changed from a non-Community destination and that those products which, under the prior surveillance regime applicable in 1996, could be imported only on presentation of a surveillance document are in fact accompanied by such a document.
6. Shipment is considered to have taken place on the date of loading onto the exporting means of transport.
7. The export document shall conform to the model shown at Appendix III. It shall be valid for exports throughout the customs territory of the Community.
8. The Republic of Macedonia shall notify the Commission of the European Communities of the names and addresses of the appropriate governmental authorities of the Republic of Macedonia which are authorized to issue and to verify export documents

together with specimens of the stamps and signatures they use. The Republic of Macedonia shall also notify the Commission of any change in these particulars.

9. Certain technical provisions on the implementation of the double-checking system are set out in Appendix IV.

Article 2

1. The Republic of Macedonia undertakes to supply the Community with precise statistical information on the export documents issued by the authorities of the Republic of Macedonia pursuant to Article 1.

Such information shall be transmitted to the Community by the end of the month following the month to which the statistics relate.

2. The Community undertakes to supply the authorities of the Republic of Macedonia with precise statistical information on surveillance documents issued by Member States in respect of the products listed in Appendix I. Such information shall be transmitted to the authorities of the Republic of Macedonia by the end of the month following the month to which the statistics relate.

Article 3

If necessary, at the request of either of the Parties, consultations shall be held on any problems arising from the operation of the double-checking system. Such consultations shall be held promptly. Any consultations held under this Article shall be approached by both Parties in a spirit of co-operation and with a desire to reconcile the difference between them.

Article 4

Any notices to be given hereunder shall be given:

- in respect of the Community, to the Commission of the European Communities (DG Trade E/2 and DG Enterprise C/2),

- in respect of the Republic of Macedonia, to its Mission to the European Communities, the Ministry of Foreign Affairs and the Ministry of Economy.

PROTOCOL 3
on trade between the Republic of Macedonia and the Community in processed agricultural products

Article 1

1. The Community and the Republic of Macedonia apply to processed agricultural products the duties, listed in Annex I and Annex II respectively in accordance with the conditions mentioned therein, whether limited by quota or not.

2. The Cooperation Council shall decide on:

- extensions of the list of processed agricultural products under this Protocol,
- amendments to the duties referred to in Annexes I and II,
- increases in or the abolition of tariff quotas.

3. The Cooperation Council may replace the duties established by this Protocol by a regime established on the basis of the respective market prices of the Community and the Republic of Macedonia of agricultural products actually used in the manufacture of processed agricultural products subject to this Protocol. It will establish the list of goods subject to these amounts and as a consequence, the list of basic products; to this end, it will decide the general rules of application.

Article 2

The duties applied pursuant to Article 1 may be reduced by decision of the Cooperation Council:

- when in trade between the Community and the Republic of Macedonia the duties applied to the basic products are reduced, or
- in response to reductions resulting from mutual concessions relating to processed agricultural products.

The reductions provided for under the first indent shall be calculated on the part of the duty designated as the agricultural component which shall correspond to the agricultural products actually used in the manufacture of the processed agricultural products in question and deducted from the duties applied to these basic agricultural products.

Article 3

The Community and the Republic of Macedonia shall inform each other of the administrative arrangements adopted for the products covered by this Protocol. These arrangements should ensure equal treatment for all interested parties and should be as simple and flexible as possible.

TITLE II

DEFINITION OF THE CONCEPT OF "ORIGINATING PRODUCTS"

1. For the purpose of implementing this Agreement, the following products shall be considered as originating in the Community:
 - (a) products wholly obtained in the Community within the meaning of Article 5 of this Protocol;
 - (b) products obtained in the Community incorporating materials which have not been wholly obtained there, provided that such materials have undergone sufficient working or processing in the Community within the meaning of Article 6 of this Protocol;

 - (a) products wholly obtained in the Republic of Macedonia within the meaning of Article 5 of this Protocol;
 - (b) products obtained in the Republic of Macedonia incorporating materials which have not been wholly obtained there, provided that such materials have undergone sufficient working or processing in the Republic of Macedonia within the meaning of Article 6 of this Protocol.

ARTICLE 3

Bilateral cumulation in the European Community

Materials originating in the Republic of Macedonia shall be considered as materials originating in the Community when incorporated into a product obtained there. It shall not be necessary that such materials have undergone sufficient working or processing, provided they have undergone working or processing going beyond that referred to in Article 6(1).

ARTICLE 4

Bilateral cumulation in the Republic of Macedonia

Materials originating in the Community shall be considered as materials originating in the Republic of Macedonia when incorporated into a product obtained there. It shall not be necessary that such materials have undergone sufficient working or processing, provided they have undergone working or processing going beyond that referred to in Article 6(1).

ARTICLE 5

Wholly obtained products

1. The following shall be considered as wholly obtained in the Community or the Republic of Macedonia:

- (a) mineral products extracted from their soil or from their seabed;

ARTICLE 6

Sufficiently worked or processed products

1. For the purposes of Article 2, products which are not wholly obtained are considered to be sufficiently worked or processed when the conditions set out in the list in Annex II are fulfilled.

The conditions referred to above indicate, for all products covered by this Agreement, the working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials. Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in the list is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.

2. Notwithstanding paragraph 1, non-originating materials which, according to the conditions set out in the list, should not be used in the manufacture of a product may nevertheless be used, provided that:

- (a) their total value does not exceed 10 per cent of the ex-works price of the product;
- (b) any of the percentages given in the list for the maximum value of non-originating materials are not exceeded through the application of this paragraph.

This paragraph shall not apply to products falling within Chapters 50 to 63 of the Harmonised System.

3. Paragraphs 1 and 2 shall apply except as provided in Article 7.

ARTICLE 7

Unit of qualification

1. The unit of qualification for the application of the provisions of this Protocol shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Harmonised System.

Accordingly, it follows that:

2. Where, under General Rule 5 of the Harmonised System, packaging is included with the product for classification purposes, it shall be included for the purposes of determining origin.

ARTICLE 9

Accessories, spare parts and tools

Accessories, spare parts and tools dispatched with a piece of equipment, machine, apparatus or vehicle, which are part of the normal equipment and included in the price thereof or which are not separately invoiced, shall be regarded as one with the piece of equipment, machine, apparatus or vehicle in question.

ARTICLE 10

Sets

Sets, as defined in General Rule 3 of the Harmonised System, shall be regarded as originating when all component products are originating. Nevertheless, when a set is composed of originating and non-originating products, the set as a whole shall be regarded as originating, provided that the value of the non-originating products does not exceed 15 per cent of the ex-works price of the set.

ARTICLE 11

Neutral elements

In order to determine whether a product originates, it shall not be necessary to determine the origin of the following which might be used in its manufacture:

2. The prohibition in paragraph 1 shall apply to any arrangement for refund, remission or non-payment, partial or complete, of customs duties or charges having an equivalent effect, applicable in the Community or the Republic of Macedonia to materials used in the manufacture and to products covered by paragraph 1(b) above, where such refund, remission or non-payment applies, expressly or in effect, when products obtained from the said materials are exported and not when they are retained for home use there.

3. The exporter of products covered by a proof of origin shall be prepared to submit at any time, upon request from the customs authorities, all appropriate documents proving that no drawback has been obtained in respect of the non-originating materials used in the manufacture of the products concerned and that all customs duties or charges having equivalent effect applicable to such materials have actually been paid.

4. An invoice declaration shall be made out by the exporter by typing, stamping or printing on the invoice, the delivery note or another commercial document, the declaration, the text of which appears in Annex IV, using one of the linguistic versions set out in that Annex and in accordance with the provisions of the domestic law of the exporting country. If the declaration is hand-written, it shall be written in ink in printed characters.

5. Invoice declarations shall bear the original signature of the exporter in manuscript. However, an approved exporter within the meaning of Article 22 shall not be required

to sign such declarations provided that he gives the customs authorities of the exporting country a written undertaking that he accepts full responsibility for any invoice declaration which identifies him as if it had been signed in manuscript by him.

6. An invoice declaration may be made out by the exporter when the products to which it relates are exported, or after exportation on condition that it is presented in the importing country no longer than two years after the importation of the products to which it relates.

ARTICLE 22

Approved exporter

1. The customs authorities of the exporting country may authorise any exporter who makes frequent shipments of products under this Agreement to make out invoice declarations irrespective of the value of the products concerned. An exporter seeking such authorisation must offer to the satisfaction of the customs authorities all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this Protocol.

2. The customs authorities may grant the status of approved exporter subject to any conditions which they consider appropriate.

3. The customs authorities shall grant to the approved exporter a customs authorisation number which shall appear on the invoice declaration.

4. The customs authorities shall monitor the use of the authorisation by the approved exporter.

5. The customs authorities may withdraw the authorisation at any time. They shall do so where the approved exporter no longer offers the guarantees referred to in paragraph 1, does not fulfil the conditions referred to in paragraph 2 or otherwise makes an incorrect use of the authorisation.

ARTICLE 23

Validity of proof of origin

1. A proof of origin shall be valid for four months from the date of issue in the exporting country, and must be submitted within the said period to the customs authorities of the importing country.

2. Proofs of origin which are submitted to the customs authorities of the importing country after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit these documents by the final date set is due to exceptional circumstances.

3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin where the products have been submitted before the said final date.

ARTICLE 24

Submission of proof of origin

Proofs of origin shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of the Agreement.

ARTICLE 25

Importation by instalments

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) of the Harmonised System falling within Sections XVI and XVII or heading Nos 7308 and 9406 of the Harmonised System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

ARTICLE 26

Exemptions from proof of origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a proof of origin, provided that such products are not imported by way of trade and have been declared as meeting the requirements of this Protocol and where there is no doubt as to the veracity of such a declaration. In the case of products sent by post, this declaration can be made on the customs declaration CN22/CN23 or on a sheet of paper annexed to that document.
2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.
3. Furthermore, the total value of these products shall not exceed Euro 500 in the case of small packages or Euro 1 200 in the case of products forming part of travellers' personal luggage.

ARTICLE 27

Supporting documents

The documents referred to in Articles 17(3) and 21(3) used for the purpose of proving that products covered by a movement certificate EUR.1 or an invoice declaration can be considered as products originating in the Community or in the Republic of Macedonia and fulfil the other requirements of this Protocol may consist inter alia of the following:

- (a) direct evidence of the processes carried out by the exporter or supplier to obtain the goods concerned, contained for example in his accounts or internal bookkeeping;
- (b) documents proving the originating status of materials used, issued or made out in the Community or the Republic of Macedonia where these documents are used in accordance with domestic law;
- (c) documents proving the working or processing of materials in the Community or the Republic of Macedonia, issued or made out in the Community or the Republic of Macedonia, where these documents are used in accordance with domestic law;
- (d) movement certificates EUR.1 or invoice declarations proving the originating status of materials used, issued or made out in the Community or the Republic of Macedonia in accordance with this Protocol.

ARTICLE 28

Preservation of proof of origin and supporting documents

1. The exporter applying for the issue of a movement certificate EUR.1 shall keep for at least three years the documents referred to in Article 17(3).
2. The exporter making out an invoice declaration shall keep for at least three years a copy of this invoice declaration as well as the documents referred to in Article 21(3).
3. The customs authorities of the exporting country issuing a movement certificate EUR.1 shall keep for at least three years the application form referred to in Article 17(2).
4. The customs authorities of the importing country shall keep for at least three years the movement certificates EUR.1 and the invoice declarations submitted to them.

ARTICLE 29

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not ipso facto render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

ARTICLE 30

Amounts expressed in Euro

1. For the application of the provisions of Article 21(1)(b) and Article 26(3) in cases where products are invoiced in a currency other than euro, amount in the national currency of the Republic of Macedonia equivalent to the amounts expressed in euro shall be fixed annually.
2. A consignment shall benefit from the provisions of Article 21(1)(b) or Article 26(3) by reference to the currency in which the invoice is drawn up, according to the amount fixed by the Community or the Republic of Macedonia.
3. The amounts to be used in any given national currency shall be the equivalent in that currency of the amounts expressed in euro as at the first working day of October. The amounts shall be communicated to the European Commission by 15 October and shall apply from 1 January the following year. The European Commission shall notify the Republic of Macedonia of the relevant amount.
4. The Community or the Republic of Macedonia may round up or down the amount resulting from the conversion into its national currency of an amount expressed in euro. The rounded-off amount may not differ from the amount resulting from the conversion by more than 5 per cent. The Republic of Macedonia may retain unchanged its national currency equivalent of an amount expressed in euro if, at the time of the annual adjustment provided for in paragraph 3, the conversion of that amount, prior to any rounding-off, results in an increase of less than 15 per cent in the national currency equivalent. The national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.
5. The amounts expressed in euro shall be reviewed by the Cooperation Council at the request of the Community or the Republic of Macedonia. When carrying out this review, the Cooperation Council shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in euro.

TITLE VI

ARRANGEMENTS FOR ADMINISTRATIVE COOPERATION

ARTICLE 31

Mutual assistance

1. The customs authorities of the EC Member States and of the Republic of Macedonia shall provide each other, through the European Commission, with specimen impressions of stamps used in their customs offices for the issue of movement certificates EUR.1 and with the addresses of the customs authorities responsible for verifying those certificates and invoice declarations.
2. In order to ensure the proper application of this Protocol, the Community and the Republic of Macedonia shall assist each other, through the competent customs administrations, in checking the authenticity of the movement certificates EUR.1 or

the invoice declarations and the correctness of the information given in these documents.

ARTICLE 32

Verification of proofs of origin

1. Subsequent verifications of proofs of origin shall be carried out at random or whenever the customs authorities of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Protocol.
2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the movement certificate EUR.1 and the invoice, if it has been submitted, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the enquiry. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.
3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.
4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.
5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in the Community or the Republic of Macedonia and fulfil the other requirements of this Protocol.
6. If in cases of reasonable doubt there is no reply within ten months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

ARTICLE 33

Dispute settlement

Where disputes arise in relation to the verification procedures of Article 32 which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Cooperation Council.

In all cases the settlement of disputes between the importer and the customs authorities of the importing country shall be under the legislation of the said country.

ARTICLE 34

Penalties

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

ARTICLE 35

Free zones

1. The Community and the Republic of Macedonia shall take all necessary steps to ensure that products traded under cover of a proof of origin which in the course of transport use a free zone situated in their territory, are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.
2. By means of an exemption to the provisions contained in paragraph 1, when products originating in the Community or the Republic of Macedonia are imported into a free zone under cover of a proof of origin and undergo treatment or processing, the authorities concerned shall issue a new EUR.1 certificate at the exporter's request, if the treatment or processing undergone is in conformity with the provisions of this Protocol.

TITLE VII

CEUTA AND MELILLA

ARTICLE 36

Application of the Protocol

1. The term "Community" used in Article 2 does not cover Ceuta and Melilla.
2. Products originating in the Republic of Macedonia, when imported into Ceuta or Melilla, shall enjoy in all respects the same customs regime as that which is applied to products originating in the customs territory of the Community under Protocol 2 of the Act of Accession of the Kingdom of Spain and the Portuguese Republic to the European Communities. The Republic of Macedonia shall grant to imports of products covered by the Agreement and originating in Ceuta and Melilla the same customs regime as that which is granted to products imported from and originating in the Community.
3. For the purpose of the application of paragraph 2 concerning products originating in Ceuta and Melilla, this Protocol shall apply *mutatis mutandis* subject to the special conditions set out in Article 37.

ARTICLE 37

Special conditions

1. Providing they have been transported directly in accordance with the provisions of Article 13, the following shall be considered as:

- (1) products originating in Ceuta and Melilla:
 - (a) products wholly obtained in Ceuta and Melilla;
 - (b) products obtained in Ceuta and Melilla in the manufacture of which products other than those referred to in (a) are used, provided that:
 - (i) the said products have undergone sufficient working or processing within the meaning of Article 6 of this Protocol; or that
 - (ii) those products are originating in the Republic of Macedonia or the Community within the meaning of this Protocol, provided that they have been submitted to working or processing which goes beyond the insufficient working or processing referred to in Article 7(1).
- (2) products originating in the Republic of Macedonia:
 - (a) products wholly obtained in the Republic of Macedonia;
 - (b) products obtained in the Republic of Macedonia, in the manufacture of which products other than those referred to in (a) are used, provided that:
 - (i) the said products have undergone sufficient working or processing within the meaning of Article 6 of this Protocol; or that
 - (ii) those products are originating in Ceuta and Melilla or the Community within the meaning of this Protocol, provided that they have been submitted to working or processing which goes beyond the insufficient working or processing referred to in Article 7(1).

2. Ceuta and Melilla shall be considered as a single territory.

3. The exporter or his authorised representative shall enter "the Republic of Macedonia" and "Ceuta and Melilla" in Box 2 of movement certificates EUR.1 or on invoice declarations. In addition, in the case of products originating in Ceuta and Melilla, this shall be indicated in Box 4 of movement certificates EUR.1 or on invoice declarations.

4. The Spanish customs authorities shall be responsible for the application of this Protocol in Ceuta and Melilla.

TITLE VIII

FINAL PROVISIONS

ARTICLE 38

Amendments to the Protocol

The Cooperation Council may decide to amend the provisions of this Protocol.

ANNEX I

INTRODUCTORY NOTES TO THE LIST IN ANNEX II

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 6.

Note 2:

- 2.1. The first two columns in the list describe the product obtained. The first column gives the heading number or Chapter number used in the Harmonized System and the second column gives the description of goods used in that system for that heading or Chapter. For each entry in the first two columns a rule is specified in column 3 or 4. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in column 3 or 4 apply only to the part of that heading as described in column 2.
- 2.2. Where several heading numbers are grouped together in column 1 or a Chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Harmonized System, are classified in headings of the Chapter or in any of the headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.
- 2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 has to be applied.

Note 3:

- 3.1. The provisions of Article 6, concerning products having acquired originating status which are used in the manufacture of other products, shall apply, regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the Republic of Macedonia or in the Community.

Example:

An engine of heading No 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 % of the ex-works price, is made from "other alloy steel roughly shaped by forging" of heading No ex 7224.

If this forging has been forged in the Republic of Macedonia from a non-originating ingot, it has already acquired originating status by virtue of the

rule for heading No ex 7224 in the list. The forging can then count as originating in the value-calculation for the engine, regardless of whether it was produced in the same factory or in another factory in the Republic of Macedonia. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.2. The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.
- 3.3. Without prejudice to Note 3.2, where a rule states that "materials of any heading" may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression "manufacture from materials of any heading, including other materials of heading No ..." means that only materials classified in the same heading as the product and of a different description than that of the product as given in column 2 of the list may be used.
- 3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of headings Nos 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other, or both.

- 3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

Example:

The rule for prepared foods of heading No 1904, which specifically excludes the use of cereals and their derivatives, does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth – even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn – that is, the fibre stage.

- 3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4:

- 4.1. The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres which have been carded, combed or otherwise processed, but not spun.
- 4.2. The term "natural fibres" includes horsehair of heading No 0503, silk of headings Nos 5002 and 5003, as well as wool-fibres and fine or coarse animal hair of headings Nos 5101 to 5105, cotton fibres of headings Nos 5201 to 5203, and other vegetable fibres of headings Nos 5301 to 5305.
- 4.3. The terms "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials, not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 4.4. The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings Nos 5501 to 5507.

Note 5:

- 5.1. Where, for a given product in the list, reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent 10 % or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below.)
- 5.2. However, the tolerance mentioned in Note 5.1 may be applied only to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,

- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,
- coconut, abaca , ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- current-conducting filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped,

- products of heading No 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading No 5605.

Example:

A yarn, of heading No 5205, made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 % of the yarn.

Example:

A woollen fabric, of heading No 5112, made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509, is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp), or woollen yarn which does not satisfy the origin-rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning), or a combination of the two, may be used provided their total weight does not exceed 10 % of the weight of the fabric.

Example:

Tufted textile fabric, of heading No 5802, made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210, is a only mixed product if the cotton fabric is itself a mixed fabric made from yarns classified in two separate headings, or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is, accordingly, a mixed product.

- 5.3. In the case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped", this tolerance is 20 % in respect of this yarn.
- 5.4. In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film", this tolerance is 30 % in respect of this strip.

Note 6:

- 6.1. Where, in the list, reference is made to this Note, textile materials (with the exception of linings and interlinings), which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.
- 6.2. Without prejudice to Note 6.3, materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

- 6.3. Where a percentage-rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

- 7.1. For the purposes of headings Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the "specific processes" are the following:
 - (a) vacuum-distillation;
 - (b) redistillation by a very thorough fractionation-process ⁽⁵⁾;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation.

⁵ See Additional Explanatory Note 4(b) to Chapter 27 of the Combined Nomenclature.

- 7.2. For the purposes of headings Nos 2710, 2711 and 2712, the "specific processes" are the following:
- (a) vacuum-distillation;
 - (b) redistillation by a very thorough fractionation-process (⁶);
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (ij) isomerisation;
 - (k) in respect of heavy oils of heading No ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 % of the sulphur-content of the products processed (ASTM D 1266-59 T method);
 - (l) in respect of products of heading No 2710 only, deparaffining by a process other than filtering;
 - (m) in respect of heavy oils of heading No ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250 °C, with the use of a catalyst, other than to effect desulphurization, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading No ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (n) in respect of fuel oils of heading No ex 2710 only, atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C, by the ASTM D 86 method;
 - (o) in respect of heavy oils other than gas oils and fuel oils of heading No ex 2710 only, treatment by means of a high-frequency electrical brush-discharge.

⁶ See Additional Explanatory Note 4(b) to Chapter 27 of the Combined Nomenclature.

- 7.3. For the purposes of headings Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations, such as cleaning, decanting, desalting, water-separation, filtering, colouring, marking, obtaining a sulphur-content as a result of mixing products with different sulphur-contents, or any combination of these operations or like operations, do not confer origin.

Exceptions to the obligation to provide assistance

 - (b) be likely to prejudice public policy, security or other essential interests, in particular in the cases referred to under Article 10(2); or
 - (c) violate an industrial, commercial or professional secret.

3. Where the applicant authority seeks assistance which it would itself be unable to provide if so requested, it shall draw attention to that fact in its request. It shall then be for the requested authority to decide how to respond to such a request.

4. Information obtained shall be used solely for the purposes of this Protocol.
